SUMMARY

Detail-oriented Software Engineering student and full-stack developer with hands-on experience across Java desktop/backend systems and modern React web and mobile applications. Comfortable owning a feature end to end — from UI/UX design in Figma and Canva through to functional Java and JavaScript implementations. Strong record of independently shipping real-world applications, including delivery platforms, financial systems, and communication tools, alongside professional frontend engineering experience at ZiloTech.

TECHNICAL SKILLS

Languages: Java, JavaScript / TypeScript, Python, C, C++, HTML, CSS
Frameworks & Libraries: React, React Native, Tailwind CSS, Bootstrap, Java Swing
Tools & Platforms: Git, Linux, VS Code, Canva, Figma

WORK EXPERIENCE

Frontend Engineer – ZiloTech

Cameroon | 2024 – 2026

- Built and shipped 10+ production web and mobile applications end-to-end, including a food delivery platform (TOMATO) and a full e-commerce platform, both using React JS.
- Integrated Google Gemini AI into a customer-facing chatbot and rebuilt an in-house ChatBot system to improve user support.
- Designed and implemented UI/UX for multiple mobile apps (Z-Learn, Z-Shop) and websites, from wireframes in Figma to production interfaces.
- Delivered supporting tools including a Resume AI Enhancer, a Netflix-style clone, a real estate listings site, and a school registration system.
- Took on cross-functional roles beyond development — including mobile app graphic design, promotional video editing, and personal security app development (Aura Safe).
- Developed AckNowKarer, a news broadcasting website, during an internship placement at ZiloTech.

SELECTED PERSONAL PROJECTS

- Banking System Application (Java):** Designed a core banking simulation supporting account creation, deposits, withdrawals, and transaction history tracking.
- Betting Platform (Java):** Built a small-scale betting platform modelling odds, wagers, and payout logic.
- Desktop Alarm Application (Java):** Developed a scheduling desktop alarm program with custom reminder and notification handling.
- To-Do List App with Email Notifications:** Built a task manager that sends automated email reminders and triggers a functioning alarm for due tasks.
- Live Video Conferencing Web App (React JS):** Implemented real-time peer-to-peer video calling in the browser using React JS.
- University Complaint Management System:** Built a web platform for students to submit, track, and resolve institutional complaints.
- School Report Card System:** Developed a system for recording student grades and automatically generating report cards.

EDUCATION & CERTIFICATIONS

- Bachelor of Technology (B.Tech), Software Engineering — University of Bamenda, College of Technology (Start Year – Present)
- General Certificate of Education, Advanced Level (GCE A-Level) — Baptist High School, Ndop (2023 – 2025)
- General Certificate of Education, Ordinary Level (GCE O-Level) — Saint Pius X Catholic College, Tatum (2022)
